

SHUN BIN YEOH

Singapore Citizen | 8448 1532 | yshunbin@gmail.com | shunb.in

Notice Period: 1 Month

WORK EXPERIENCE

Defence Science and Technology Agency | Software Engineer

Jan 2026 – Present

- Trained and deployed an AI curator (Gemini, via Lovable AI) on top of the existing software-asset system to auto-surface end-of-support/end-of-life dates – eliminating hours of manual per-asset search for compliance stakeholders.
- Built a Dataiku dashboard with colour-coded risk trends on that data, giving users and management visibility to plan software upgrades proactively instead of reactively.
- Developed and deployed a systems-monitoring tool (Java 17, Spring Boot, SQLite) to production using PowerShell probes to roll up daily backup failures into a one-week snapshot – replacing the need to open each failure email individually.

Stack: Spring Boot, Java, SQLite, PowerShell, Dataiku, Git

Hewlett Packard Enterprise | Software Engineer

Jul 2023 – Jan 2025

- Built real-time shell scripts for Aruba (AOS-CX) network switches (SNMP, CLI, API) to cut manual configuration time and reduce human error in enterprise customer deployments.
- Drove SDLC improvements through module migrations, unit-test performance tuning and resolving client-reported live bugs.

Software Engineer Intern

Jan – May 2023

- Automated unit-test frameworks to catch network performance issues before handoff to QA, reducing manual, ad-hoc testing.

Stack: Python, Bash, C, ntysh, Git

Acronis | Software Engineer Intern

Jun – Dec 2022

- Deployed hardware-encrypted GCP infrastructure (Intel, AMD-SEV) to validate performance for Acronis' secure backup product prior to release, meeting the guaranteed data confidentiality customers required.
- Implemented an ELK stack pipeline to index and search backup metadata, cutting the time to trace a customer's backup issue from hours of manual searching to a quick lookup.

Stack: Java, Python, Golang, C, Docker, Git

Pixium Digital | Software Engineer Intern

Jan – May 2022

- Developed full-stack web applications and HR tools (PHP, Yii 2.0, jQuery, AJAX) on AWS S3 to store project images and videos and LocalStack to test storage integration before deployment – replacing manual HR paperwork with self-service tooling.

Stack: TypeScript, JavaScript, PostgreSQL, MySQL, PHP, HTML, CSS, Yii 2.0, Docker, Git

Hubble | Software Engineer Intern

Aug – Nov 2021

- Migrated a monolithic backend to a Ruby on Rails microservices ecosystem (Docker-Compose, K8s), building out a dedicated user service to handle the added load of user base growth.
- Developed asynchronous web features in React using Redux Saga, making the app feel responsive instead of freezing while waiting on backend calls.

Stack: Ruby, TypeScript, Docker, MySQL, Git

EDUCATION

Nanyang Technological University | Bachelor of Computer Science, AI & ML Focus

Aug 2019 – May 2023

Civil Aviation University of China (Tianjin) | Overseas Industrial Training Program

Mar 2016

Singapore Polytechnic | Diploma in Aerospace Electronics

2014 – 2017

TECHNICAL PROJECTS

Self-Supervised Image Inpainting (FYP) | NTU Final Year Project

Aug 2022 – May 2023

- Built and trained a self-supervised autoencoder (TensorFlow) that reconstructs missing regions of images without needing labelled training data, then used Bayesian hyperparameter optimisation to raise reconstruction accuracy from SSIM 0.79 to 0.97 (PSNR 27.12) – outperforming several published inpainting methods on the same benchmark.

Stack: Python, TensorFlow, Hyperopt, NumPy, Matplotlib

NozzieMozzie | Software Engineering

Jan – Apr 2021

- Built an Android app visualising dengue clusters as interactive map polygons, helping residents and health officials spot high-risk areas at a glance instead of parsing raw case data.

Stack: Java, HTML, Postman

SKILLS

Proficient: Java, Python, SQL, Bash (Linux OS), Docker, Git

Exposure: C, PHP, GDScript, Golang, JavaScript, TypeScript, Ruby, SCSS, CSS, HTML, MATLAB, React, TablePlus, Postman, Yii 2.0, Koala, k6 (Grafana), Prometheus, KVM, QEMU, Android Studio, Google Colab, Spring

Conversational Languages: English, Chinese (Mandarin)
